

# Dr. Deniz Akdemir

---

*Principal Biostatistician & Machine Learning Scientist*

---

## Professional Profile

Dr. Deniz Akdemir is a Principal Biostatistician & Machine Learning Scientist with 3,400+ Google Scholar citations and pioneering expertise in statistical genomics. His highly-cited publications, including “Genomic Selection and Association Mapping in Rice” (626 citations), have revolutionized plant breeding methodologies. As maintainer of multiple CRAN packages (CovComBR, TrainSel, STPGA), he develops cutting-edge genomic tools now applied to clinical stem cell transplantation at the National Marrow Donor Program.

---

## Core Competencies

- Genomic Data Analysis & Bioinformatics
- Statistical Genomics & Computational Biology
- Integrative Omics Data Processing
- High-Throughput Sequencing Analysis
- Data Visualization & Scientific Communication

---

## Education

- **PhD. in Statistics**, Bowling Green State University, Bowling Green, OH, USA, 2009.
- **M.A. in Applied Statistics**, Bowling Green State University, Bowling Green, OH, USA, 2004.
- **M.S. in Statistics**, Middle East Technical University, Ankara, Turkey, 2003.
- **B.A. in Business Administration**, Middle East Technical University, Ankara, Turkey (1994-1999).

---

## Research Interests

Deniz’s research is centered on developing innovative statistical methodologies for genomic selection and prediction. His groundbreaking work addresses key challenges in optimizing training populations, integrating environmental covariates with genomic data, and designing multi-objective breeding strategies. With highly-cited publications in rice, wheat, maize, and olive genomics, he has established new approaches to training set optimization under population structure, genomic mating strategies, and the incorporation of GWAS results into genomic prediction models. His current research extends these methodologies to clinical applications, particularly in stem cell transplantation optimization.

## Network of coauthorship of Deniz Akdemir

### Core Skills

- **Statistical Genomics:** Expert in genomic selection methodologies, training set optimization, GWAS, models for epistasis, genotype-by-environment interactions, multi-trait analysis, breeding value prediction, and genomic relationship matrices.
- **Multi-omics Integration:** Statistical methods for combining heterogeneous genomic and phenotypic datasets, integration of environmental covariates, multi-objective optimized breeding strategies.
- **Bioinformatics & Computational Biology:** Design of optimal training populations for selective phenotyping, genetic algorithm applications in genomics, machine learning approaches for genomic prediction.
- **Software Tools:** Developer of specialized genomic tools including TrainSel (R) and train-selpy (Python) for genomic selection, EMMREML for mixed models with known covariance structures.
- **Programming & Data Analysis:** Expert in R and Python for genomic data analysis and bioinformatics pipelines, proficient in SAS and C++ for high-performance computing with large-scale genomic datasets.
- **Applications:** Extensive experience in rice, wheat, maize, and olive genomics, optimization of plant breeding programs, and translation of genomic prediction to practical breeding outcomes.

### Career Summary

- **Senior Clinical Data Scientist, National Marrow Donor Program, Minneapolis, USA (2023 - Current):** Engaged in statistical and machine learning analysis of stem

cell transplant data, focusing on research into donor optimization. Applied for grants and submitted manuscripts to peer-reviewed journals. Wrote patent applications.

- **Clinical Data Scientist, National Marrow Donor Program, Minneapolis, USA (2021 - 2023):** Engaged in statistical and machine learning analysis of stem cell transplant data, focusing on research into donor optimization.
- **Postdoctoral Research Associate, School of Agriculture and Food Science, University College Dublin, Dublin, Ireland (2019 - 2021):** Conducted research on methods for combining heterogeneous genomic and phenotypic datasets and prepared statistical software for data analysis.
- **Statistical Consultant, Cornell Statistical Consulting Unit, Cornell University, Ithaca, NY, USA (2017 - 2019):** Provided statistical consulting services for researchers at Cornell University, including the preparation and presentation of statistics workshops.
- **Postdoctoral Research Associate, Department of Plant Breeding and Genetics, Cornell University, Ithaca, NY, USA (2011 - 2017):** Focused on research developing new methodologies in genomic selection and prediction, mixed models, and machine learning, advising graduate students and preparing statistical software.
- **Visiting Assistant Professor, Department of Statistics and Actuarial Science, University of Central Florida, Orlando, FL, USA (2010 - 2011):** Responsibilities included teaching Data Mining Methodology, Theoretical Statistics, Applied Time Series Analysis, and Nonparametric Statistics.
- **Visiting Assistant Professor, Department of Mathematics and Statistics, Ohio Northern University, Ada, OH, USA (2009 - 2010):** Taught Statistics for Professionals, Statistics for Engineers, and Statistical Computing, catering to various undergraduate levels.

## Key Genomics Projects

- **Genomic Selection Methodology Development:** Pioneered innovative statistical approaches for genomic selection in major crops, fundamentally advancing breeding program efficiency. Published the highly-cited “Genomic Selection and Association Mapping in Rice” (626 citations) that established new standards in the field.
- **Training Population Optimization:** Developed novel algorithms for optimizing training population selection in genomic prediction, resulting in the TrainSel R package and trainselpy Python implementation, tools now widely used in plant breeding research globally.
- **Environmental Genomics Integration:** Created statistical frameworks for incorporating environmental covariates into genomic prediction models, significantly improving prediction accuracy across different environments and enhancing climate adaptation breeding.
- **Multi-objective Breeding Strategy Optimization:** Designed innovative approaches for balancing multiple breeding objectives simultaneously, enabling more sustainable and efficient crop improvement programs through advanced statistical modeling.

## Workshops and Training Sessions

- **Genomic Assisted Breeding Workshops:** Conducted specialized workshops in the USA, Ireland, Spain, and Belgium, educating the agricultural community on genomic technologies and computational methods for breeding program optimization.
- **Genomic Selection Masterclass:** Delivered expert training sessions on implementing genomic selection strategies at major agricultural research institutions internationally.

7. **Akdemir, D.** & Isidro-Sánchez, J. (2019). Genome wide association study of 5 agronomic traits in olive (*Olea europaea* L.). *Genetics and Molecular Research*, 18, 39. (39 citations)
8. **Akdemir, D.**, Isidro-Sánchez, J., & Leyer, M. (2020). Multi-omics approaches for genomic selection in plant breeding programs. *Journal of Experimental Botany*, 71(18), 5215-5226.

## Software Development

### CRAN Packages:

1. **CovCombR** (Maintainer) - Covariance-Based Combination Methods for Linear Regression
2. **TrainSel** - Selection of Training Populations for Genomic Prediction
3. **STPGA** - Selection of Training Populations by Genetic Algorithm

### GitHub Packages:

1. **trainselfpy** - Pure Python implementation for optimal training population selection
2. **EMMREML** - Fitting Mixed Models with Known Covariance Structures
